## PROFESSIONAL EXPERIENCE

Cox Media Group

*Senior Lead Software Engineer and Scrum Master*

2014-present

- Developed leadership skills while leading 2+ teams of software engineers, totalling anywhere from 7-12 individual contributors per team
- Lead scrum ceremonies (daily standup, sprint retrospective, sprint planning, user story pointing)
- Prioritized backlog and planned projects with input and collaboration from business analysts and project managers
- Drove architectural and production planning decisions regarding code review and release process, technology stack selection, and team composition
- Worked 100% remotely while managing and collaborating with developers and QA, effectively communicated with upper management to manage expectations and perceptions of my teams
- Remain the only employee of the company to reach the leadership level while working remotely

Lehigh University

*Senior Software Developer*

2012-2014

- Luminis 5 Implementation Tech Lead - spearheaded project to upgrade from a single box Luminis 4 installation to a multibox, high availability Luminis 5 installation
- Software developer – developed applications for other departments and organizations

Plus One Health Management, Inc.

2011-2012

*Senior Software Developer*

- Expanded the capabilities of Plus One's FLEX program management platform using C# on the .NET technology stack.
- Facilitated the technical aspects of more than seven go-live events, all of which were completed on schedule.

Smarter Travel Media, LLC (of the TripAdvisor Media Group) 2008-2011  
*Senior Software Engineer*

- Was initially responsible for brainstorming Search Engine Optimization (SEO) strategy and formulating specific plans to add or restructure content to sites, launch new sites, etc.
- Developed web applications in one of the largest LAMP deployments currently serving content on the web.
- Developed a suite of in-house tools for SEO analytics and data gathering in Ruby and Python on the Django framework.
- Acted as liaison between upper management of STM and the SEO team at parent company TripAdvisor.

JD2 Environmental, Inc. 2006-2008  
*IT Manager/DBA*

- Built an IT infrastructure from the ground up.
- Designed and developed a system to store and aggregate data around environmental audits whose front end was written in PHP.
- Was responsible for the day to day IT operations of the company.
- Migrated a number of legacy systems for clients.
- Conducted environmental audits, eventually overseeing environmental engineers.
- Named the company president's "go-to man" for all things, whether technical or not.

Biblical Theological Seminary 2004-2006  
*Associate IT Manager*

- Maintained the school's IT resources and oversaw or assisted with day to day IT operations.
- Wrote applications to sync Active Directory to the Admissions database, automating the time-consuming task of adding students to Active Directory at the beginning of every semester.

## **EDUCATION**

Eastern Nazarene College 2000-2004  
BS, Computer Science

Lehigh University 2013  
MS, Computer Science (partially completed)
